

### **In the Specification**

The Examiner's objections to the specification include a request for page numbers and a request for revised status information about two concurrently filed applications referenced in the pending application. The Applicants have addressed the Examiner's objections to the specification and have addressed other matters of a minor nature by means of a substitute specification. Enclosed are a marked-up copy of the specification and a clean copy. In particular, the Applicants have amended the specification to include page numbers. The presence of 16 pages in the marked-up specification and 15 pages in the clean copy is due only to the removal of extraneous white space and other material from the specification. Additionally, on page 1 of the specification, extraneous information has been removed from the header, the heading "Description" has been removed and the font and style of the title has been changed. On page 14, the font and style of the heading "Claims" has been changed. Additional changes to the claims are identified beginning on page 3 of this response. On page 16, the title of the application has been removed and the font and style of the heading "Abstract" has been changed. Finally, paragraph [0025] has been amended to reflect the filing dates of the referenced applications.
